Our vision for every child life in all its fullness;

Our prayer for every heart, the will to make it so.
Changes in the world enforce us to change and adapt. This is also faced by Wahana Visi Indonesia, as a humanitarian Organization that accompanying the community in various contexts.

The frequent disasters in Indonesia have required the capacity of our emergency response team to increase in a short time. It has been carried out through the emergency response in Bali, Papua, Lombok and Central Sulawesi in 2018, and for a long-term assistance to the communities.

Coordination with the national and regional governments become an important element for the sustainability and synchronization of programs to accelerate the achievement of the Sustainable Development Goals. Supported by our partners and donors, we can continue to assist the community until today and the upcoming years. In both normal and emergency situation, our development programs does not change. It focuses on children in various context including education, health, economy and child protection.

I give high appreciation to all who support and collaborate with us. I believe that by working together, we can face every kind of change because our vision for every child remains to give them life in all its fullness.

Through all things happened in 2018, we came to realize that as human beings, we need each other. The consecutive natural disasters have made us realize the divine greatness and human vulnerability. As an organization living with the community and children, we are grateful to go through all situations together. We also work together to support the fulfillment of children’s basic rights in every regional context from Sumatra to Papua.

More than 60 thousand children have been reached through the emergency response that we are conducting for Mount Agung eruption in Bali, malnutrition and measles outbreak in Asmat, Papua, and earthquakes in Lombok and Central Sulawesi. We are able to do all of this because of the supports from all of our partners and donors, both domestic and international. We continue to accompany the community for long term with immense enthusiasm. The community’s willingness to make the village safer from any kind of child violence, the increased of child’s health, the increased quality of education, including contextual character education and the increased of family income have encouraged us to continue working with them.

All of the support from partners and donors have inspired us to channel every trust and care to provide sustainable change to make children live their life in all its fullness. We are grateful for every support and collaboration in 2018. Let us continue to walk together for the better future of Indonesian children.
Area Program
Wahana Visi Indonesia 2018

Wahana Visi Indonesia (WVI) is a Christian humanitarian social organization, which works to bring sustainable transformation in the life of the children, families and communities living in poverty. WVI dedicates itself to corporate with the most vulnerable community regardless their religion, race, ethnic, and gender.

Since 1996, WVI has been implementing community development programs focusing on children. Millions of children in Indonesia have received the benefits of WVI’s assistance program. WVI has emphasized long-term development programs by using an approach of sustainable area program through the operational offices in WVI’s assisted areas. In 2018, WVI gave support to 83,876 Indonesian children spread across in 61 service points in 14 provinces.

The priority programs for children focuses in four sectors, namely, Health, Education, Child Protection and Economy. These programs are run through three approaches, which are transformational development, advocacy, and emergency response.

To carry out its programs, WVI shows a strong commitment to Sustainable Development Goals (SDGs), a global agenda initiated by the United Nations. WVI brings together several SDGs targets and indicators into each program to improve the life quality of children, families and the people of Indonesia.
Children Grow and Develop as They Age

Wahana Visi Indonesia (WVI) provides an environment that supports children aged 0-6 years old in order to grow healthy and develop optimally. The programs meet the needs of health, nutrition, sanitation and hygiene, as well as Early Childhood Care and Development (ECCD).
beneficiaries
20,868 children
in 218 villages
36 sub-districts
8 provinces

835 pregnant women, parents
and caregivers of children aged
0-23 months received counselling

666 households have
nutrition garden

Nutrition
Infant and Young Child Feeding (IYCF)
IYCF aims to improve the knowledge and skills of parents and caregivers so
that they can do feeding practices well. This program promotes the
importance of paying attention to children’s nutrition during the first 1,000
Days of Life.
269 cadres and 125 health workers attended IYCF counselling training
770 parents and caregivers have increased their knowledge of IYCF

Nutrition Garden
Homestead food production, also known as nutrition garden, is a concept of
family nutrition fulfillment through the use of gardens planted with
vegetables rich in vitamins and minerals.

Integrated Health Post
5,218 children were monitored for growth and development at
the integrated health post

Water Sanitation & Hygiene (WASH)
The WASH program aims to promote access to clean water for drinking
and sanitation. This program is implemented through two approaches,
Community-Based Total Sanitation (CBTS) and Community-Based Water
Management.

CBTS is a national government program
consisting of five pillars:
1. Open Defecation Free (ODF)
2. Hand Washing with Soap
3. Household Water Treatment and Safe Storage (HWTS)
4. Household Waste Management
5. Home Wastewater Management

955 households are registered
in community-based water
services
948 people have increased access
to safe drinking water sources
I am very happy to join the training of Infant and Young Child Feeding (IYCF) because currently I understand the correct way to feed the under-five children. The community has never learned it before. This is why I am happy to share the knowledge of IYCF to the community.”

Rosa (28) from Sekadau district, West Kalimantan.

Early Childhood Care and Development (ECCD)

1,933
children aged 3-6 years participate in ECCD

847
parents and caregivers have increased their insight and skills in childcare

ECCD is a coaching effort for new-born babies up to 6 years old children, which is carried out through the provision of educational stimuli to help both physical and spiritual growth and development so that children are ready to enter further education.

Health

Community-Based Integrated Management of Childhood Illness (C-IMCI) is a project model used by WVI to raise awareness of parents and caregivers about the importance of seeking treatment for sick children, especially fever, cough, diarrhoea and malnutrition.

104 cadres were trained in preventive promotive C-IMCI.

Citizen Voice and Action (CVA)

CVA is an approach to improve maternal and child health status using dialogues between service users, service providers and the government in order to achieve better basic health services.

EDUCATION

Quality Education for Elementary School Children

Children in middle childhood, ages 6-11, are top priorities for Wahana Visi Indonesia in developing programs in the education sector. The beginning of this period is when the children enter their first grade of elementary school (SD).
Holistic Integrative Early Childhood Care and Development

In addition to basic education, the WVI education program is also implemented for pre-schoolers with an Integrative Holistic Integrative Early Childhood Care and Development model (HI – ECCD). The goals of preschool education are preparing the parents, caregivers and communities in order to understand the Early Childhood Development and providing targeted support for basic life skills.

having reached 10,349 students in 108 schools

strengthened the capacity of 736 teachers through school-based teacher training

The program continues to build strong strategic and operational relationships with the District Education Office and work with private companies as donors such as Samsung, Prudential, the Japanese Embassy in Indonesia, and active members of the ASEAN Safe School Initiatives. A total of US $1,102,503 was spent in 2018 to implement the program.

Child-Friendly School Policy

Several elementary schools in Sikka (East Nusa Tenggara) as well as Laui Naya’/ Pegunungan Tengah and Sentani (Papua) have been assisted by WVI in accordance with Child-Friendly Schools policy.

Reading and Writing (Literacy)

WVI helps children improving literacy in reading and writing through the Wahana Literasi program in 5 districts (Jayawijaya/Pegunungan Tengah, Sentani, Biak, Landak, and East Manggarai)

280 parents and caregivers have supported children’s ability to read

108 teachers attended the Literacy Unlock training

12 reading camps were established

The target of education program is to increase knowledge parenting skills: 847 parents and caregivers (reaching over 114%)
Contextual Character Education (CCE)

WWI initiates the concept of Contextual Character Education which has been used in some elementary schools in West Kalimantan and NTT. The concept of learning is not only focused on improving the learning outcomes of children in reading, writing and arithmetic, but also the development of behavior and attitudes based on prevailing local wisdom values.

38 schools (9 in West Kalimantan and 33 in NTT) have implemented Contextual Character Education.

MoU between WWI and the Siku Education Office to replicate Contextual Character Education in 30 elementary schools.

Besides ECCD, the educational properties have helped our learning process. When I taught the students about color, I could show them red box. I did the same method when I taught them about numbers.”

Mama Yarince (20) from Jayawijaya, Papua.
Protecting Children from Physical and Sexual Violence

The website of the Indonesian Child Protection Commission (KPAI) noted that the three main cases of violations of children's rights in 2018 were dominated by sexual violence; family related cases and alternative care; as well as pornography and cyber cases.
Parenting with Love
To increase knowledge and skills of parents/caregivers in nurturing nonviolent children using Parenting with Love model (Celebrating Families and Positive Parenting module).
2,378 parents/caregivers have increased their knowledge in disciplining children and child protection issues

Channel of Hope
WVI is involving religious, traditional, and community leaders to strengthen child protection system through the Channel of Hope approach.
433 religious-and community leaders
72 churches and 22 religious organizations

Child Participation
16,750 children participated in various activities (children forum, socialization, training on children's rights and child protection) facilitated by WVI
17,515 children attended children's activities organized by partners of WVI

Children-Group and Forum
127
Children Group
(6-11 years old)

56
Children Forum
(12-18 years old)

The National Baseline Survey in 33 districts/cities in the area program of WVI shows that 93.23% of parents/caregivers use physical punishment or violence to discipline their children.
End Violence Against Children (EVAC) Campaign

EVAC Campaign #DimulaiDariSaya (#StartingWithMe) has been conducted since 2017 and given positive impact in:

202,548 children receive the benefits of the policy
7,999 people support campaign activities

Birth Certificate Ownership

Based on the survey conducted by WV in the end of 2017, 55% of children aged 0-18 years do not have a Birth Certificate. For this reason, WV cooperates with the Citizenship and Civil Registration Service as well as various elements of the community to strive for children to have a Birth Certificate. Up to the present there are 52,390 children who have already had Birth Certificate due to the cooperation between WV and 29 districts & cities in 9 provinces.

Commitment to support Child-Friendly City/District

25 cities/districts support the realization of the Child-Friendly City/District

Pro-child Policy

- 21 Children Forum
- 37 new pro-child policies
- 10 pro-child policies are implemented

"This is an incredible experience for me. Previously I only dreamed of going the closest province to North Sumatra to talk about child protection issues, but I was given the opportunity to represent Indonesia at an international conference."

Novi (17) from Nias district, North Sumatra, participant of Youth for Change Conference (YFCC) 2018 in Bangkok, Thailand.

According to the survey, 68% of teenagers do not know of services and mechanisms to receive/respond/report abuse, neglect, exploitation and violence against children.

WVI is trying to strengthen the social services and child protection services by establishing and strengthening community-based child protection mechanisms.

18 villages/sub-villages have implemented systems and mechanisms to prevent and respond to child protection issues
21 cases of violence against children were reported and referred to related institutions
22 stakeholders were able to demonstrate psychosocial support for children and the community

PARTNERS

Church
Custom Forum
Civil Registration Department
Ministry of Women Empowerment & Child Protection
Families Afford to Fulfill the Basic Needs of Children

The welfare of children to be able to grow and develop depends on economic conditions and the family financial management.
WVI runs a food and economic security program targeting communities (especially farmers and micro entrepreneurs) and youths.

235 farmers join the Horticulture Farmers Association, Manggarai (East Nusa Tenggara)

Market Working for the Poor (M4P)
M4P brings the private sector and the government closer to the community. Each part has its own role: WVI is as a community organizer, the government becomes a technical consultant and the private sector supports agricultural input, technical guidance and market readiness:
- 25 farmers & 4 agricultural extension workers in 2 villages, Parigi Moutong, (Central Sulawesi)
- 54 micro entrepreneurs, Jakarta
- 51 farmer and weaver groups in 23 villages, Manggarai (East Nusa Tenggara)

Local Value Chain Development
Special agricultural strengthening is also carried out using the LVCD approach, conducted in Central Sulawesi, South Sulawesi, Southeast Sulawesi and East Nusa Tenggara through the Cocoa Life and Moringa Programs. The commodities are corn, moringa and chocolate.
- More than 100 groups of the Village Savings and Credit Association (VSLA) were formed
- 1,715 families were trained and 1,144 families were able to implement family financial management
- 570 people have access to financial institutions

Accumulating Saving and Credit Association (ASCA) was presented in Indonesia Development Forum (IDF) 2018, on August 10-11 2018.

331 farmers and business owners are facilitated by production skills

47 savings and loan groups with ASCA model were formed
251 people in Jakarta and Manggarai (East Nusa Tenggara) took skills courses and diploma programs.

Youth Development Program
This program has been developed to ensure young people get sufficient economic opportunities, through having a job or becoming an entrepreneur.

Cultural Revitalization
WWI is running a program to restore good traditional agreements in the past so that it is useful for the children’s welfare. The burdensome customary rules are reviewed and new customary agreements are established.

Implementation area: Alor District and East Sumba (East Nusa Tenggara). A total of 13 customary groups in Alor have simplified their culture, so that more children are able to continue their studies to university, they have also birth certificates now and there is less domestic violence.

“...A few months ago I loaned IDR 800,000 from ASCA. In ASCA we can borrow and pay it with interest. Interest is only paid once. I can pay school fee, buy school uniform for my children by joining ASCA.”

Child Protection in Emergencies

Children become the most vulnerable group compared to adults during a disaster and post-disaster. WV has assisted the children and community in emergency response, disaster risk reduction and climate change adaptation programs. The goal is to increase child protection from various vulnerability conditions.
During October 2017-September 2018, WV sent a response team to Bali due to the impact of the Mount Agung eruption, then to Asmat related to the Extraordinary Outbreak of Measles and Malnutrition, Lombok after the earthquake, and Central Sulawesi which was hit by the earthquake and tsunami.

**Mount Agung eruption (Bali), September 2017 – March 2018**

**Extraordinary Outbreak of Asmat (Papua), January 2018 – January 2019**

**Lombok earthquake (East Nusa Tenggara), August 2018 – July 2019**

**Tsunami and earthquake in Central Sulawesi, September 2018 – September 2020**

---

**Emergency Response**

a. Non-food Items/NFI distribution (hygiene kits, family kits, children kits, and school kits) 3,172 kits for affected families and children (Bali and Lombok)

b. Nutrition program (Infant and Young Child Feeding / IYCF) 257 people (mothers, pregnant women and caregivers) attended dissemination/training of health and nutrition (Lombok)

234 children under age of 2 received complementary food (Lombok)

c. Health & WASH Program (drinking water supply and environmental sanitation program) in Asmat Beneficiaries: 1,130 people and 659 children

d. WASH Program in Lombok Beneficiaries: 1,260 households (5,040 people)

e. Education in emergencies 190 people from 67 institutions attended training in education and child protection in emergencies (Lombok)

f. Child protection program through Child-Friendly Space (CFS) activities and psychosocial support 3,494 children participated in CFS (Bali and Lombok) 786 children participated in mobile library activities (Lombok)

g. Economic development program 99 women received skills training (Bali) 14 organizations involved in Market Assessment (Bali) 38 representatives from 14 organizations involved in the Joint Market Assessment (Lombok)
Disaster Risk Reduction (DRR)

DRR is carried out through the approach of Safe School Initiative and Community-Based Disaster Risk Management in 3 cities: Bogor, Jakarta and Tangerang.

Beneficiaries of the Safe School program:
1,328 adults and 5,813 children

Beneficiaries of Disaster Risk Programs:

a. The Process of Contingency Planning (Renkon) and Community Based Disaster Risk Reduction (PRBBK):
   3,103 adults
   1,268 children

b. Renkon Process, PRBBK, Gender and Disability
   Mainstreaming (PUGD) to the public, Rapid Need Assessment (RNA) and Incident Command System (ICS):
   3,826 adults
   1,345 children

Adaptation to Climate Change

The first program conducted by WV in climate change adaptation was in East Sumba through a program to increase the number of trees and plants which had an impact on improving the economy. This program utilizes Farmer Managed Development Regeneration (FMNR +) or farmer-managed Natural Regeneration. It is called paloetang in local language.

Beneficiaries in 9 sub-district of Haharu sub-district in East Sumba:
2,985 adults
260 children

Child Success Story

In Swedia, Tigor Speaks up to End Violence against Children

Tigor

2018 was a memorable year for Tigor (16). After being selected as one of three child representatives from Indonesia in “The WHO 8th Milestones of Global Campaign for Violence Prevention Meeting” on October 2017 in Toronto, Canada, Tigor was reselected for “End Violence Solutions Summit” in Stockholm, Sweden last February 2018.

Tigor was the representative of Jayawijaya Child Forum which was assisted by the Women Empowerment, Child Protection for Population Control and Family Planning Agency and also Welhara Visi Indonesia in Jayawijaya districts. In the high international level meeting to end violence against children in Stockholm, Tigor delivered the speech about his opinion and concern on child’s issues around the world. In front of 386 people from 67 different countries, Tigor spoke up. The event was attended by the Queen and Prime Minister of Sweden, ministers from some countries including Yohana Yembise, the Indonesian Minister of Women Empowerment and Child Protection.
Volunteer: Creativity and Heart for the Children

Since 2017, WVI has invited volunteers both individual and corporate to join in the purposeful activity for community and child welfare from all around WVI’s assisted areas.

In 2018, five volunteerism activities were held. On February, five volunteers joined in the activity in Biak, Papua. On May and June, the other volunteers joined in the activity in Landak, West Kalimantan and South Central Timor, East Nusa Tenggara. Three of them was involved in Landak while the other six people joined in Kupang, East Nusa Tenggara on June. Last, the other four volunteers visited Biak on August 2018.

When joining volunteerism activity, the volunteers consisting of college students, child sponsors and company workers facilitated many sessions and activities. They taught the kindergarten and elementary school students to sing, draw and speak English. Some volunteers also assisted the children to write letters for their sponsors. Volunteers were happy with this activity since they were involved in WVI’s activity to share the knowledge for the children in needs.

We can find many child-friendly districts and child-friendly cities in Indonesia but for the Child-Friendly Island, it can only be found in Hiri Island at Ternate District, North Maluku. The Hiri Island was declared as child-friendly island on August 25, 2018. The declaration was attended by Yohana Yembise, the Minister of Women Empowerment and Child Protection. The minister said that Hiri Island was the first child-friendly island in Indonesia and it was the moment for Ternate city to motivate other districts and cities in North Maluku province to do the same thing.

The conflict caused by race, ethnicity and religion happened in North Maluku several years ago. To erase the stigma, WVI Territorial Religious Harmony Forum and the government of North Maluku held an event called ‘Child Festival in Diversity’ which was held on the celebration of National Children Day and The Declaration of Hiri as Child-Friendly Island. 800 elementary school students and children assisted by WVI attended the event.

Under the theme ‘Diversity’, the event was held. It was also intended to End Violence against Children that was in line with National Strategy. The rational strategy to End Violence against Children was echoed by the Ministry of Women Empowerment and Child Protection and the alliance of non-government organizations focusing on children including WVI.

Hiri Island in Ternate
the First Child-Friendly Island in Indonesia
World Bank Support GPSA Project

WVI runs Global Partnership for Social Accountability (GPSA) since 2014 to 2018. The project is supported by World Bank through Citizen Voice and Action (CVA) approach focusing on government accountability to improve the standard of maternal and child health. In the last four years, the program has been implemented around 60 villages from 11 sub-districts in three districts (Kupang, North Central Timor and Sikka) in East Nusa Tenggara province. To celebrate the program, the Festival of CVA for Government Accountability to Improve Basic Service of Maternal Child Health was held at the end of the program. The village facilitators, village midwives, head of community health center from three districts and other government representatives attended this event.

Coalition and Child Forum from European Union to Build Community Capacity

The Citizen and Voice Action (CVA) approach is implemented by European Union through Civil Society Organization (CSO) program which is funded by European Union. The project has been implemented since 2016 to 2019 to improve CSO consisting of community, coalition and child forum related to the implementation and monitoring of Child-Friendly City/District policy specifically for health and community welfare cluster using CVA approach.

Sekadau district is one of three districts where EU CSO program works in West Kaimana besides Sintang and Melawi. The initiation of Sekadau to be Child-Friendly District opens the gate for child rights fulfillment in this area. The EU CSO has initiated the Coalition of Child Care Community in Sekadau (KOMPAS). Currently, the government including Regent and the legislative council give full support for KOMPAS.

To date, KOMPAS has assisted the CVA approach implemented 15 villages in three sub-districts. Based on the data, KOMPAS gave the recommendation to the Sekadau district government about regional law on child-friendly district in sub-district and village and the additional budget for maternal and child health program.
Good Cooperation for Positive Impact

“Malnutrition and poverty are two common issues in Sumbi Island. It can be a major challenge for community development. We are very blessed to work with Wahana Visi Indonesia through community development program to cope with these two issues. In the last two years, we have witnessed positive impacts as the result of nutrition garden programs, integrated health post cadre assistance program and farmer assistance program. We hope that the cooperation will continue and give positive impact to the community and other partners.”

-Michele Juliarne Soryadiyaya, Chairwoman, William & Lily Foundation-

Channeling God’s Love

“Through WVI, our willingness to help others affected by the disasters are channelled. WVI provides us with information regularly through emergency response activity. We know that all of the aids from donors are well channeled right to the most vulnerable children and community affected by the disaster. We hope that WVI emergency response channel God’s love for the affected children and community. Thank you for good cooperation. God bless all of WVI ministry.”

- Ayub Kurnawan Priyatna, Self-Development Center Dept, Citra Berkat Foundation, for Citra Karya and Citra Berkat Schools-

Freely You Have Received, Freely Give

“In 2016, I started to know WVI ministry. I was studying at Malang State University at that time. I attended ‘Worship Night with Sidney Mohede’ concert. In the middle of the concert, Pastor Sidney asked us to be a blessing for others by becoming a child sponsor through WVI. I want others to feel God’s love. Freely you have received, freely give. Through WVI, I can be a blessing for others by giving donation. I hope that more sponsors care about others in need and have heart to be a blessing. What God gives us today, it is not only for us since we can share it to others too.”

-Dodi Alexander Antonang, 26, staff of Freeprot Indonesia, child sponsor for Siska and Bask children-

Make Indonesia Proud!

“I was very happy because I could participate in volunteerism activity in Neke and Kualafantu village in Aoe, East Nusa Tenggara. I met other great volunteers and WVI stuff in Aoe. I remembered that I spent some days with the village community. They welcomed us. I hope that this positive activity can move many people to do something good for others. I wish the generation of Neke and Kualafantu village can move forward can be the generation that is not only tech savvy and smart but also loving the culture of East Nusa Tenggara. Make East Nusa Tenggara Proud! Make Indonesia proud!”

- Febrina Rumung (23), Volunteer in Aoe, South Central Timor, 28 May - 2 June 2018
GRANT INSTITUTION

The rights of children, enshrined in the Convention on the Rights of the Child which will celebrate its 30th anniversary in 2019, are one of the human rights that the EU and Indonesia are committed to protect and fulfill. The “Empowered CSOs to Support Government for Accountable Child Friendly City/District” project implemented by World Vision Germany in collaboration with Wahana Visi Indonesia has achieved significant results in terms of improvements in children’s rights and reduction of disparities. Around IDR 21 billion from the Regional Action Plan for Accelerating Child Friendly Cities/Districts has been spent in the fulfillment of children’s rights in Sintang, Sekadau, and Melawi (West Kalimantan). These include development of Community Health Centres (Puskesmas) and Maternal and Child Health services (Posyandu); recruitment of additional health workers; empowerment of Children’s Forum Secretariat; to contribute to policy development, advocacy and monitoring, etc. The European Union is proud to be associated with this remarkable achievement.

H.E. Mr. Vincent Guerend, EU Ambassador to Indonesia and Brunei Darussalam

GOVERNMENT

Water and sanitation are human’s basic needs. It is also a requirement for clean and healthy living. The construction of sanitation and clean water facility aims to increase the productivity and quality of the community for sustainable economic development. As the partner of Ministry of Health, WVI provides sustainable and safe sanitation and clean water facility. The effort is carried out to the approach to the community independence through Community Based Total Sanitation (CBTS).

To increase the community demand toward sanitation and clean drinking water, WVI advocates the stakeholders to provide support environment and increasing supply. CBTS approach can make the drinking water accessible not only in normal situation but also in emergency, post-emergency and in rehabilitation situation. Together with the Ministry of Health and other partners, WVI initiate the approach. It is expected that through the partnership, WVI keep supporting CBTS approach to make Open-Defecation Free areas.

dr. Iman Agus Nuradi, SPK, Director of Environmental Health, Ministry of Health, Indonesia

WVI on SOCIAL MEDIA

nadiaaknae This past week, I was blessed with the opportunity to visit the city of Agats and its surrounding villages that are home to the Asmat tribe in Papua. Despite the extreme weather conditions and tough circumstances that these people have to face everyday, it warms my heart to see how they continue to appreciate everything that they have and be some of the happiest and kindest individuals I’ve ever met.

Thank you to @wahanavisi_id for the amazing experience that helped me step out of my comfort.
