COVID-19 PANDEMIC EMERGENCY RESPONSE (COPE)

**External Report 3 Months On
18 March - 17 June 2020**

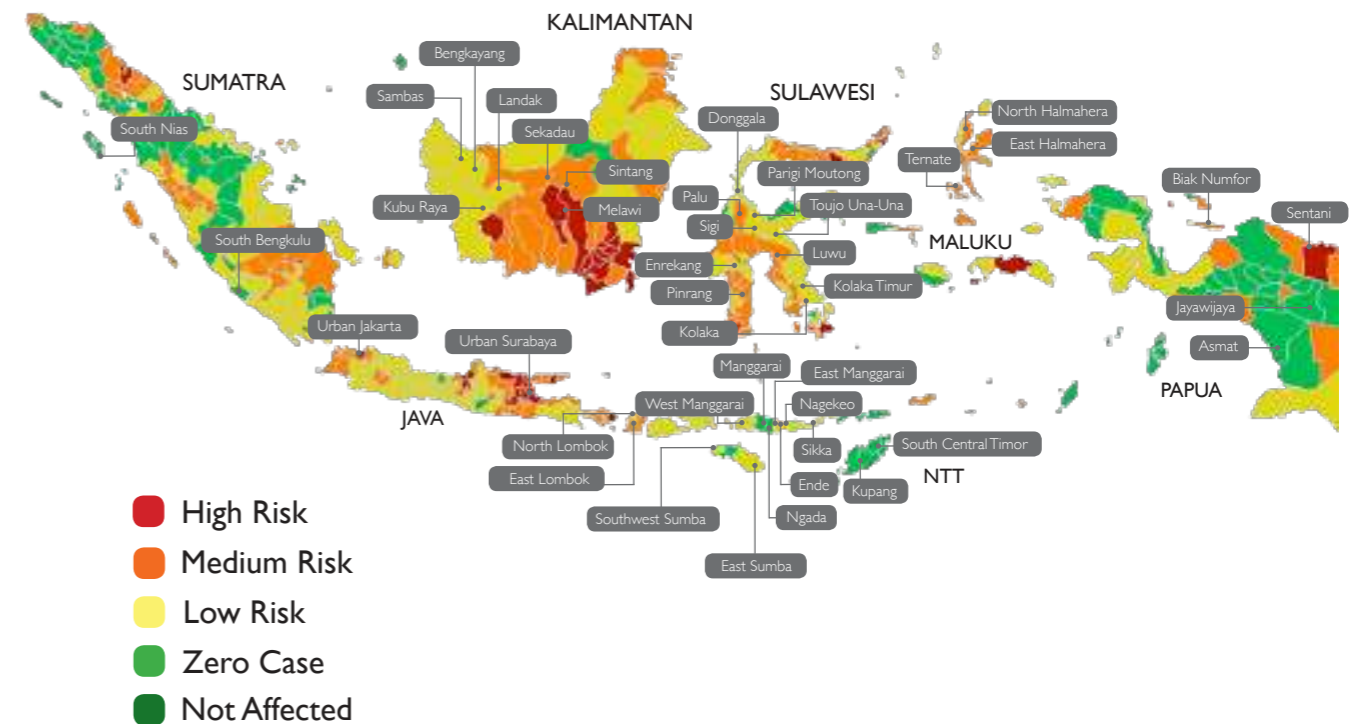

Three months on, per June 17, 2020, Wahana Visi Indonesia has reached and assisted:

through following strategic objectives:

- Scaling up preventive measures to limit the spread of diseases
- Supporting health system and workers
- Support for children impacted by COVID-19 through education, child protection, food security and livelihoods
- Collaborate and advocate to ensure vulnerable children are protected

COPE RESPONSE AREAS

COVID-19 PANDEMIC EMERGENCY RESPONSE (COPE)

Coronavirus disease (COVID-19) is a respiratory illness caused by a new strain of coronavirus, first discovered in 2019 and has not been previously identified in humans, according to the World Health Organization (WHO). The new virus was identified during an investigation into an outbreak on December 2019 in the city of Wuhan, the Capital of Hubei Province in China. On January 30 2020, WHO declared COVID-19 outbreak a Public Emergency of International Concern (PHEIC) due to exportation of cases to several countries.

On March 11, 2020, the WHO declared COVID-19 as a pandemic after increasing number of confirmed cases, with a total of more than 118,000 cases spread across 114 countries including Indonesia.

RESPONSE SUMMARY (as of 17 June 2020)

522,712

people received information about the COVID-19 prevention

249,154

masks are distributed

35,443

Information, Education and Communication materials (KIE) are printed and distributed

9,389

hand-washing supplies are distributed

260

community-level public handwashing stations established or maintained

4,763

Personal Protective Equipment (PPE) packages are provided for medical personnel

180

medical facilities are assisted (including hospital, clinic) with COVID-19 preventative or response support

1,950

children are reached with Mental Health and Psychosocial Support (MHPSS)

938

children and their families are supported to continue learning from home

653

household received cash and voucher disbursements

290

individuals received food security assistance

TESTIMONIAL

NURUL, one of the beneficiaries from Jenggala Village, North Lombok, who received a food package from WVI as part of the COPE response

We are very grateful for this assistance. Previously, we had difficulties to meet our needs regarding to the existence of this outbreak

UUN, a member of the Sekadau Child Forum, West Kalimantan

We distributed cloth masks to the children and put informative brochures in public spaces such as food stalls and places of worship. The community in my village understand more about how to prevent COVID-19 after reading the brochures that we posted in public places.

AFRIZAL, a community member who uses handwashing facility in North Cipinang Besar

Thank you WVI for providing hand washing facilities in form of 2 reservoir units for community in RW 07, North Cipinang Besar, Jatinegara. We will take care of hand washing facilities

STRATEGIC OBJECTIVE

1

Scaling up preventive measures to limit the spread of diseases

Communities including program beneficiaries and assisted children in ministry areas practice preventive measures to reduce COVID-19 transmission.

“ Through COPE, WV Indonesia has reached and assisted 974,218 people per June 17, 2020. Around 522,712 people are reached through the promotion of preventive behaviors.

To help the prevention of COVID-19, WV Indonesia disseminated 35,443 information, education and communication (IEC) materials, established 260 community-level public handwashing stations and distributed 9,389 handwashing supplies. Also, around 2,373 caregivers are provided with essential materials. WV Indonesia also cooperated with 435 faith leaders to disseminate preventive messages for COVID-19 prevention.

2

Supporting health system and workers

WV Indonesia prioritized and provided support to the health workers through the distribution of 4,763 PPE for the medical personnel. The PPE is complying to WHO's standards and consists of surgical masks, goggles, gowns, gloves, head cover, and shoe cover. WV Indonesia also assisted 180 medical facilities including hospital and clinic with COVID-19 preventative or response support.

3

Support for children impacted by COVID-19 through education, child protection, food security and livelihoods

Through COPE, WV Indonesia support the Ministry of Education to ensure safe school operation (promoting procedures for teachers and students that become unwell, information sharing and targeted age-specific for COVID-19 prevention practices) and support the children, families and teachers to continue education when school are closed (e.g home learning materials, activity packs).

“ Up to now, 938 children and their families have been supported to continue children's education remotely while 1,272 children are reached with reached sharing and targeted age specific health education.

For child protection, WV Indonesia has coordinated with the local government (including child protection services, social services and health services) and community-based child protection group (PATBM) to facilitate the establishment of local-level community care.

Currently, 1,950 children are reached with Mental Health and Psycho-social Support (MHPSS), 8 PATBM Cadre are engaged and 458 children and their families are reached with registration and care protocols to prevent separation and stigma of child and caregiver during treatment and isolation.

In terms of food security, WV Indonesia will monitor the status of pregnant/ lactating women, infants, and elderly. Nutritious food shall be provided for vulnerable families in quarantine, especially for under-two-year-old children. Currently, 290 individuals received food security assistance from WV Indonesia's COPE project.

Panduan Cara Penyajian, Tekstur dan Frekuensi makan untuk bayi dan anak di situasi normal & bencana.

0-6 bulan	6-9 bulan	9-12 bulan	12-24 bulan
<p>Asi Eksklusif</p> 	<p>Lanjutkan Menyusui</p> <p>2-3 sdm bertahap hingga 125ml 2-3x makan 1-2x selingan</p> 	<p>Lanjutkan Menyusui</p> <p>125ml bertahap hingga 200ml 3-4x makan 1-2x selingan</p> 	<p>Lanjutkan Menyusui hingga 2 tahun atau lebih</p> <p>200ml hingga 250ml + 3-4x makan 1-2x selingan</p> 

Ibu dimotivasi untuk dapat terus menyusui. Anak usia 0-6 bulan hanya mengonsumsi ASI.

CUKUP ASI SAJA

Makanan dibuat dengan disaring. Tekstur makanan lumat dan kental.

DISARING

Bahan makanan sama dengan untuk orang dewasa. Tekstur makanan dicincang/dicacah, dipotong kecil, dan selanjutnya makanan yang diiris-iris. Perhatikan respons anak saat makan.

DICINCANG

Bahan makanan dimasak dengan tekstur yang sama dengan orang dewasa. Perhatikan respons anak saat makan.

MASAK BIASA

TIDAK ADA GUNANYA SUSU DAN PRODUK SATU SAJIAN (BOTOL, DOT, LAMPERGI) TANPA PERSETUJUAN DARI DINAS KESEHATAN PROVINSI KABUPATEN/KOTA SETERAPAN

Sel benak, beri wadah tuang yang rapat untuk menjaga kebersihan makanan. Jangan lupa mencuci tangan dengan sabun sebelum menyiapkan makanan.

LAKUKAN 5 LANGKAH PAKSABUNYANG BENAR

For livelihood sector, families who are presumptive and on observation for COVID-19 and have to self-quarantine will receive assistance through Cash and Voucher Programming (CVP) to ensure the continuation of their daily lives and support the cost of referral transportation and others. WV Indonesia has disbursed CVP program for 653 households.

4

Collaborate and advocate to ensure vulnerable children are protected

WVI takes an advocacy approach to the government and the National Task Force through COVID-19 national disaster management cluster meetings, as well as various collaborations with civil society organizations to ensure the implementation of responses to meet the humanitarian standards, human rights and the principles of child's rights. In the regional areas, WVI also carries out various advocacy approaches to the government or regional task force along with community groups.

At the national level, WVI and the Alliance of End Violence against Children (PKTA) are actively involved in drafting and encouraging the adoption of the General Guidelines for the Protection of Child's Handling during COVID-19; the Protocols of Child Data Management; the Parenting Protocols for Children and Parents of People without Symptom (OTG), Patients under Treatment (PDP), Confirmed and Death due to COVID-19; and the Protocols of Release of Children through Assimilation, Integration, Parole, Suspension of Detention and Acquittal.

WVI also contributes in to the Protocol for the Protection of Children with Disabilities in the COVID-19 Pandemic Situation and the Protocol for Handling Cases of Violence against Women and Children with Disabilities in the COVID-19 Pandemic Period. In compiling the guidelines, WVI contributes by providing input based on data and learning. The result is the Guidelines for Preparing Shelter Facilities for Community-based Quarantine and Isolation Related to COVID-19; Guidelines for Implementing Learning from Home during COVID-19 and Guidelines for Organizing New Academic Year Learning during the COVID-19 Pandemic Period. WVI in particular, together with the national facilitators, integrated community-based child protection, compiled an important guideline for Community-Based Integrated Child Protection (PATBM). All of these protocols and guidelines are policies applied nationally throughout Indonesia.

At the regional level, WVI encourages the formation of regional task forces, intergovernmental meetings and civil society organizations, as well as various webinars or media, to encourage the fulfillment of child's rights during COVID-19 crisis.
